Work done :

Kishan :- assembling, function for add entries both .dat file, sentence generation using nltk, added translator, filtering mrs concept
Pradeep:- documentation,
Kushal sahni:- ace parcer , sentence generation using api,
Himanshu verma:-scrapping and filtering
Surya kunjam:-wx notation
Sonali :- brainstorming of filtering web scrapped data

For translation we used googletran https://pypi.org/project/googletrans/
For sentence generation https://www.nltk.org/howto/wordnet.html
Ace parsing https://pydelphin.readthedocs.io/en/latest/guides/ace.html
